

LEAD & DRINKING WATER

1 WHERE DOES ROCKFORD DRINKING WATER COME FROM?

ESSENTIALLY NO LEAD FOUND

The City of Rockford's drinking water comes from deep underground aquifers.

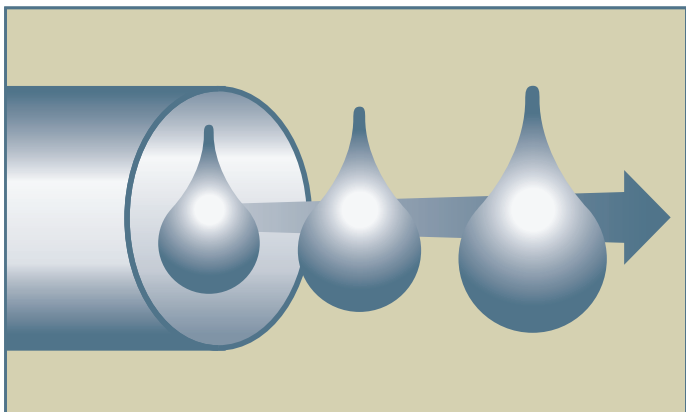

2 HOW DOES ROCKFORD TREAT THEIR DRINKING WATER?

ESSENTIALLY NO LEAD FOUND

The City of Rockford adds phosphate to minimize the release of lead from service pipes and household plumbing fixtures.

3 HOW IS WATER IN ROCKFORD DISTRIBUTED?

ESSENTIALLY NO LEAD FOUND

City of Rockford water is distributed to customers through 815 miles of pipes.

4 WHERE CAN LEAD BE FOUND?

POSSIBLE LEAD

Lead can enter your drinking water if you have a lead service pipe or household plumbing with lead. Phosphates can minimize the release from these sources.
