***Traffic Signal Removal Study***

Effective: Thursday December 21, 2017

The City will begin a study of the possible removal of the traffic signals at the intersection of West State Street and North Court Street. All signals will be shut off and bagged as part of the study and all legs of the intersection will be under stop sign control. Signs warning of the traffic study will be installed in advance of the intersection at each leg. The signals will remain covered for at least 60 days as part of a study to determine the viability of removing the signals.

Users of the roadway should use caution while entering the newly controlled intersections. Drivers are reminded to stop for pedestrians until they clear the crosswalk.

Questions regarding the signal removal study should be directed to Jeremy Carter, Traffic Engineer at the Public Works Department. Citizens are also encouraged to call with support or concerns regarding the possible signal removal.
