**SPRING CREEK ROAD RESURFACING - 2017**

Beginning Monday, October 9, 2017, the south lanes of Spring Creek Road will be closed from North 2<sup>nd</sup> Street (IL-251) to Elder Lane. From North 2<sup>nd</sup> Street (IL-251) to Starkweather Road, Spring Creek Road will be one lane eastbound and two lanes westbound. From Starkweather Road to Elder Lane, the existing traffic pattern (one lane in each direction and a two-way left turn lane) will be shifted from the south lanes to the north lanes.

The current traffic control configuration along Spring Creek Road between Elder Lane and Spring Brook Road will remain the same. In the following weeks, traffic along this segment will then be shifted to the north lanes, as well. This phase is expected to last 2-3 weeks.

The work during this phase will consist of removing and replacing the curb and gutter along the south side of the road. The roadway milling and paving operation will follow quickly thereafter. Motorists should expect delays throughout this time. We appreciate your patience during this project in efforts to provide Spring Creek with a newly surfaced roadway.

For questions concerning this project, please contact Steven Sumner at (779) 348-7645.
